

DRINKS MENU

Pomorie

Pomorie or Ancient Anchialo is a small Black Sea town founded in the 4th century BC. It is charming with its casual and romantic atmosphere. It is famous for its mud, which has been used for treatment and recovery starting from ancient times to the present day.

Pomorie Salt lake mud

The mud from the lake is a natural product with extremely valuable healing properties. It is formed at the bottom of the lake as a result of a number of biological, chemical and microbiological processes. It is composed of numerous organic and non-organic substances that have an active curative-prophylactic effect on the human body.

Pomorie Salt lake

The Pomorie salt lake is located in the northeastern part of Pomorie. It was formed naturally thousands of years ago by the gradual accumulation of sand embankments that separate it from the sea. The water-salt balance of the lake is very variable because after the strong evaporation during the summer months, its salinity increases several times compared to the levels from the beginning of the year. This contributes to the formation of the two main healing products of the lake - Estuary healing mud and lye.

Pomorie Salt lake lye

The lye is obtained after evaporation in the salt pans of the water from the lake and the crystallization of the salt. Pomorie Salt lake lye is used to relieve joint pain and to strengthen the immunity.

FRESHLY SQUEEZED JUICES Glass 250 ml

Orange	6.90 BGN
Grapefruit	6.90 BGN
Lemon	6.90 BGN
Apple	6.90 BGN
